

BUSINESS TEXTING ON YOUR NUMBER

GSM CALL

Our white glove innovative business solutions are designed to drive growth and sustainability.

Texting is added to the phone number your clients already know. Your number keeps working for calls exactly as it does today. Texts arrive and are answered in Halo, right next to your calls, so a case update or an appointment reminder is one message away.

Plans

Texting

$29 / month

Up to **500** texts sent per month

Right for most offices

Texting Plus

$49 / month

Up to **1,500** texts sent per month

Busy front desks and reminders

Texting Pro

$99 / month

Up to **4,000** texts sent per month

High-volume teams

Texts you receive are always free. A picture message counts as three texts. If your office outgrows its plan, we move you to the next one on your following invoice. Nothing is cut off and there are no per-message charges.

Included with every plan

- Carrier registration of your business and your texting program
- Review of your website for the required consent language
- STOP and HELP handling, as the carriers require
- Spanish keyword replies (ALTO, AYUDA)
- Texting inside Halo, with your call history
- No setup fee and no contract

Good to know

- Your number stays with your phone service. Only texting is added.
- Clients opt in by checking a box on your website form, which the carriers require.
- Carrier approval usually takes a few business days. We handle the whole process.
- One plan covers one business number. Additional numbers can be added to the same plan.

How it works

1

Say yes
Tell us which number should text. No forms, no fee.

2

Website check
We check your contact form and policies for the carriers' required wording and send anything missing.

3

Carrier approval
We register your business and texting program and track it through review.

4

Start texting
We send a test text with you, and Halo is ready.
